Kelvin Ajayi

Software Engineer · AI · Mobile · Backend

Nigeria | +234 814-131-6786 | kelvide7@gmail.com | kelvinajayi.cv | linkedin.com/in/kelvin-ajayi | github.com/scryptwiz

Summary

Software engineer with 5+ years shipping production mobile, backend, and AI systems for teams in the US, Australia, India, and Nigeria, owning features from the API through to the client. Lead engineer of an AI career platform with 6,500+ active users, where I designed the RAG retrieval layer, led a mobile team that cut app size by more than half, and re-architected a fintech backend to cut operating costs by 90%. Open to AI engineering, mobile, and backend roles, remote or relocating with visa sponsorship.

Experience

Software Engineer Nov 2025 – Sep 2026

Omenai – art marketplace (web, iOS, Android) *Remote, USA*

- Integrated an AI support assistant on web and mobile that answers known questions and opens a ticket only when it cannot
- Owned artwork editing end to end across API, web, and mobile, including role-based pricing for artists and galleries
- Rebuilt the media-heavy feed's rendering, raising it from ∼24–30 FPS to a stable 60 FPS with faster loads
- Fixed a production bug in the third-party shipping rate integration in 30 minutes, unblocking a stalled $5K order
- Introduced QA (API, unit, E2E, and security testing) and automated iOS/Android releases with GitHub Actions and EAS

Lead Engineer Aug 2025 – Aug 2026

Provolo (provolo.org) – AI profile, proposal, and resume optimization *Remote*

- Led a 3-engineer team alongside design, security, and marketing; grew it to 6,500+ active users
- Designed the RAG layer: embedded a curated corpus of real proposals and profiles so the LLM writes from relevant examples
- Owned the React frontend and most of the backend (TypeScript, Go), including the optimization flows and payments
- Secured billing and access with verified payment webhooks, server-side feature checks, device-bound sessions, and DNS email protection

Lead Mobile Engineer Mar 2025 – Jan 2026

Convose – social video and chat app *Remote, Australia*

- Led a 3-engineer team migrating to modern Expo (React Native 0.72 → 0.81) and moved builds to cloud CI/CD
- Cut app size from 130MB+ to 63MB and sped up startup by moving to MMKV and replacing Redux/RxJS with Zustand
- Built realtime video, voice, and chat (Agora, WebRTC, WebSockets); rebuilt chat lists with FlashList to hold 60 FPS

Software Engineer (Contract) Feb 2025 – Jun 2025

WebbyWolf – thelexicon.ai, AI article generator *Remote, India*

- Owned the build of an AI article generator on Next.js, Supabase, and the OpenAI API, including subscription access control

Software Engineer Jan 2023 – Feb 2025

Digit Information & Software Technologies *Lagos, Nigeria*

- Built the production backend for Bellfast, a fintech and marketplace platform, then right-sized its infrastructure, tightened hot paths, and added Redis caching, cutting resource usage by 52% and operating costs by 90%
- Led a 6-person frontend team converting a marketplace web app into a React Native app, with payment and logistics integrations

Earlier: Frontend Engineer, ECLA Ecosystem (Web3, Remote USA), Jun–Dec 2022 · Frontend Engineering Tutor, SQI College of ICT, Oct 2021–Feb 2022 · UI/UX & Brand Designer, Freelance, 2018–2021

Projects

Vantage (live): AI tool that weighs market history against live news to judge if a prediction-market trade is worth entering
App Doctor (source): React Native performance SDK: screen timing, network latency, and a pluggable event pipeline
Snowflake ID Generator (source): unique ID generation for distributed systems with a custom epoch and machine IDs
Kryptex (source): zero-knowledge, end-to-end encrypted manager for passwords and recovery keys

Technical Skills

Languages: TypeScript/JavaScript, Python, Go, Rust, SQL
AI: OpenAI API, LangChain, RAG, Embeddings, pgvector, QLoRA, Agents
Mobile: React Native, Expo, EAS, Zustand, FlashList, MMKV, WebRTC
Backend & Data: Node.js, FastAPI, REST, WebSockets, PostgreSQL, Redis, Supabase, Convex
Web: React, Next.js, Tailwind CSS, Framer Motion
Infrastructure: Docker, AWS, GCP, GitHub Actions, CI/CD, unit/E2E/API testing

Education & Certification

Ladoke Akintola University of Technology Oyo, Nigeria

B.Tech, Computer Science – focus: AI systems, embedded systems, robotics, databases *Sep 2021 – Jun 2026*

AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents – *Udemy (Ed Donner & Ligency)* certificate
